# FOTOSINTESI

**ENERGIA CHE DA' VITA**

3° parte: la fotosintesi

**SALUTIAMOCI!  
APRI E CHIUDI LE MANI**

**PER VIVERE HAI BISOGNO DI ENERGIA.  
PER AVERE ENERGIA MANGI!**

**PERCHE' NEL CIBO C'E' ENERGIA ? DA DOVE VIENE?**

# ATTRAVERSO LA CATENA ALIMENTARE

# ATTRAVERSO LA CATENA ALIMENTARE

# E LA PIANTA DA DOVE PRENDE L'ENERGIA?

# L'ENERGIA FINISCE NEL CIBO

# ENTRIAMO IN UNA FOGLIA PER SCOPRIRE COSA SUCCEDDE

CI SONO 2 INGRESSI: PICCIOLO E STOMI

# PRONTI A SCOPRIRE IL SEGRETO DELLE PIANTE? GUARDIAMO DENTRO LA FOGLIA!

stomi

stomi

stomi

stomi

# UNA RICETTA FANTASTICA: CIBO CON ACQUA E ARIA!

Facile per me, in  
fondo sono una  
maga, no?

# IL PRIMO INGREDIENTE E' L'ACQUA

Dove prendo  
l'acqua? Ah, sì arriva  
dalle radici attraverso  
il picciolo

# IL PRIMO INGREDIENTE E' L'ACQUA

# IL PRIMO INGREDIENTE E' L'ACQUA

Si chiama H<sub>2</sub>O perché  
è fatta da due atomi di  
Idrogeno e uno di  
Ossigeno

# IL SECONDO INGREDIENTE E' L'ARIA

Da dove arriva l'aria?  
Ma sì, dagli stomi

# IL SECONDO INGREDIENTE E' L'ARIA

Ecco l'aria

## IL SECONDO INGREDIENTE E' L'ARIA

Si chiama CO<sub>2</sub> perché  
è fatta da un atomo di  
Carbonio e due di  
Ossigeno

# IL TERZO INGREDIENTE E' L'ENERGIA

Poi mi serve tanta energia. La prendo dal sole

# IL TERZO INGREDIENTE E' L'ENERGIA

Ora ho tutti gli ingredienti

# COSTRUIAMO UN CARBOIDRATO

Devo costruire un  
carboidrato.  
mmm... Carbo....idrato

# COSTRUIAMO UN CARBOIDRATO

Ma certo: Carbo = carbonio

# COSTRUIAMO UN CARBOIDRATO

Itrato = acqua. Devo solo  
attaccare insieme Carbonio  
e Acqua

# COSTRUIAMO UN CARBOIDRATO

Ecco la parola magica:  
**FOTOSINTESI  
CLOROFILLIANA**

# COSTRUIAMO UN CARBOIDRATO

Ed ecco pronto lo zucchero  
o Carbo-Itrato, che  
contiene l'energia del

# COSTRUIAMO UN CARBOIDRATO

Mi avanza l'Ossigeno, che me ne faccio?

# COSTRUIAMO UN CARBOIDRATO

Idea! Lo butto fuori dagli stomi

# LA MAGIA DELLE MAGHE CLOROFILLA:

## FABBRICARE CIBO

## E OSSIGENO

## E I SALI MINERALI ?

A me non servono per fare il carboidrato, ma la pianta li usa per costruire proteine, vitamine e altre sostanze vitali

# LA RESPIRAZIONE:

**SIA NOI CHE LE  
PIANTE RESPIRIAMO  
OSSIGENO**

# LA RESPIRAZIONE: PER USARE L'ENERGIA DEL CIBO

**SERVE OSSIGENO**

# **LA RESPIRAZIONE:** **PER USARE L'ENERGIA DEL CIBO**

**SI RIFORMANO ACQUA E ARIA**

# SENZA LE PIANTE NON POSSIAMO VIVERE

**SENZA LE PIANTE NON POSSIAMO  
VIVERE**

**PROTEGGILE!**
